ACKNOWLEDGMENTS

I would like to take this opportunity to express my thanks to the following people without whose assistance this thesis could not have been completed.

I am grateful to my first Lanna teacher, Aj. Sak Rattanachai, for teaching me to read and write the Lanna script. I would like to express my thanks to Aj. Manop Panyo for pronouncing a two-hundred token wordlist and teaching me many helpful things about the Lanna script.

I extend my appreciation to my main adviser, Asst. Prof. Dr. Kirk R. Person, for his valuable advice, for lending me books, and for his kindness in introducing me to Aj. Sak Rattanachai and Aj. Manop Panyo. Gratitude is also extended to my thesis committee members: Aj. Art Cooper for his valuable comments on this thesis and also Aj. David Jeffery for taking much pains to make many valuable comments and corrections on drafts.

I wish to express my appreciation to Aj. Mongkhon Thuknuk, Aj. Phattanan Wongsorachai and Aj. Duangruthai Khuenjai, who allowed me to administer the questionnaires in their classes. Also I thank every Linguistics instructor at Payap University.

I wish to give thanks and respect to my parents for their encouragement to me all the time, as well as to my roommate and her family, who always encouraged me and helped me to write this thesis. I also thank Dr Boonthong Phujaruen, the president of Payap University, who gave me the chance to study for the Masters Degree in Linguistics. All of these persons share a part in my achievement.
